Get Chemistry Help from Chegg. Chegg is one of the leading providers of chemistry help for college and high school students. Get help and expert answers to your toughest chemistry questions. The term Activation Energy was introduced in 1889 by Svante Arrhenius, a Swedish scientist. It is defined as the least possible amount of energy (minimum) which is required to start a reaction or the amount of energy available in a chemical system for a reaction to take place. The accepted wisdom about the US overdose crisis singles out prescribing as the causative vector. Although drug supply is a key factor, we posit that the crisis is fundamentally fueled by economic and social upheaval, its etiology closely linked to the role of opioids as a refuge from physical and psychological trauma, concentrated disadvantage, isolation, and hopelessness. Overreliance on ... Chemistry Resources. Within this section you will find instructional materials, course notes, lectures, and other resources of interest to chemistry teachers, students, and self-learners.
