How to Draw a House with Easy Step by Step Drawing Tutorial. We draw with perspective drawing techniques in order to make a more realistic 3-dimensional object. In this technique, every set of parallel lines has its own vanishing points. In the following drawing tutorial, a simple approach to the perspective drawing will be shown to you. Every form above the eye level will recede downward to the eye level and every part of the model below the level of your eyes will extend upward to the eye level. Above, you can see how different shapes recede to the eye level with the laws of perspective. Start by creating a vanishing point by drawing an "X" at the center of the paper. Then from the center through the edge of your paper draw lines, but make sure also that the lines you have drawn can be used on your drawing. Then for the next step draw a series of poles on the right side.
