

Download Sustainability In Architecture And Urban Design

Hartford Architecture Students Win Urban Sustainability Competition Through “Live, Work, Play” Park Design
Creating great cities and places to live and work requires an ability to respond to the complexity of urban, regional, rural and remote development. See more than 425 works of architecture related to Urban Design design
We educate the next generation of architects with an emphasis on preparing them to make a significant impact on the sustainable infrastructure and urban sustainability initiatives of the District of Columbia and urban areas around the world.
